PROFESSIONAL SUMMARY

Certified Microsoft Security Operations Analyst and Azure Security Engineer newly graduated in Cybersecurity and Software Development. Combines hands-on experience in full-stack MERN engineering with practical network administration, infrastructure hardening, and Role-Based Access Control (RBAC) deployment. Proven track record of developing secure API validation middleware and engineering automated, FIFO-driven network solutions. Eager to leverage strong threat mitigation, technical troubleshooting, and secure code engineering capabilities to defend enterprise DevOps pipelines and cloud environments

EDUCATION & TECHNICAL QUALIFICATIONS

CTU TRAINING SOLUTIONS

2023 – 2026

Graduation in Cybersecurity & Software Development

- **Core Focus:** Information Security architectures, Advanced Network Defense algorithms, Cloud Infrastructure Protection, and Secure Code Engineering.
- **Relevant Coursework:** Cybersecurity Architecture, DevOps Operations, Advanced Software Development, Database Management Systems, System Integrity & Vulnerability Analysis.

TSOGO SECONDARY SCHOOL

Completed 2022

Matric Certificate

TECHNICAL SKILLS

Core Security:	Cybersecurity Basics, Information Architecture, Access Control Models (RBAC), Secure API Validation Middleware, Data Integrity & Encryption
Networking & Admin:	Network Infrastructure Setup, Printing Queue Systems, Troubleshooting, Hardware & Software Support, Structural Cabling, End-User IT Support
Languages:	Python, Java, JavaScript, C#, HTML, CSS
Frameworks & Tools:	React.js, Node.js, Express.js, MongoDB, REST APIs, Axios
Cloud & DevOps:	Microsoft Azure, CI/CD Pipelines Basics, Git, GitHub, Docker
Soft Skills:	End-User Relations, Critical Incident Problem-Solving, Cross-Functional Collaboration, Time Management, Data Integrity Reporting

PROFESSIONAL EXPERIENCE

CTU Training Solutions

3 Weeks (Work Integrated Learning - 2024)

Junior Software Developer

- Architected and developed a full-stack MERN (MongoDB, Express.js, React, Node.js) web application for enterprise asset management.
- Engineered ironclad backend user authentication schemes and implemented strict Role-Based Access Control (RBAC) schemas.
- Built structured backend CRUD application programming interfaces (APIs) utilizing Express.js routing patterns and MongoDB persistent storage layer.
- Designed and deployed secure web API endpoints enforced with custom request-validation middleware layers.
- Integrated front-end views via Axios library to provide fluid asynchronously processed real-time communication across the architectural layers.
- Utilized Git and GitHub for structural version control pipelines, automated testing, and agile scrum team synchronization.

Hoërskool Garsfontein

3 Weeks (Work Integrated Learning - 2025)

IT Administrator / Network Technician Intern

- Gained valuable exposure to real-world IT enterprise environments, specializing in corporate network deployment and infrastructure.
- Acquired extensive hands-on experience handling physical networking hardware, network architecture, and structural cable installations.
- Supported basic network infrastructure design, deployment, configuration, and day-to-day network troubleshooting operations.
- Provided high-quality end-user IT support directly, resolving complex client-side hardware and software technical issues.
- Engaged with staff and students in a highly professional customer-facing capacity, enhancing technical communication and relationship-building skills.

Clarence AI

04/2025 – 04/2026

Marketing Assistant

- Compiled and delivered high-quality weekly performance and engagement analytical reports for executive review.
- Monitored and cross-referenced multi-platform social media campaign metrics and consolidated weekly content summaries.
- Collaborated seamlessly with cross-functional technical and creative teams to align data reporting metrics with corporate strategic objectives.
- Maintained rigorous, secure, and detailed documentation structures to guarantee total data consistency and accuracy in standard operating procedures.

ACADEMIC & TECHNICAL PROJECTS

Automated Printing Management System

Hoërskool Garsfontein (WIL Project)

- Conceptualized and developed an internal network print management tool to optimize document workflows for educational faculty.
- Engineered an automated FIFO queue processing engine to handle simultaneous multi-user document submission flows efficiently.
- Integrated a real-time message notification listener to alert teachers instantly when automated print jobs were processed and ready for collection.
- Focused on reducing network printing latency and improving print server availability metrics within the campus infrastructure.

Personal Professional Portfolio Website

Independent Development

- Designed and deployed a responsive, secure portfolio platform to showcase personal code repositories, qualifications, and live applications.
- Optimized front-end accessibility and load speeds using modern semantic structures and clean styling principles.
- Implemented secure, verified contact forms and external API redirects, practicing industry-standard web deployment protocols.

Game Application Project

CTU Training Solutions

- Collaborated actively within a focused developmental scrum sprint to architect and test a desktop game application engineered in Python.
- Designed the graphical homepage layout and user interface patterns focused on user engagement.
- Contributed to the core functionality engine development, logical system integrations, and multi-tier structural debugging.
- Practiced proper version control workflows, branch structuring, and standard project lifecycle planning.

CERTIFICATIONS & LANGUAGES

- **National Certificate: Information Technology: SYSTEMS DEVELOPMENT** – Issued by MICT SETA
- **Information Technology: Database Development** – Issued by MICT SETA
- **Further Education and Training Certificate: Information Technology: SYSTEMS DEVELOPMENT** – Issued by MICT SETA
- **FET Certificate: SYSTEMS DEVELOPMENT** - Issued by CTU Training Solutions
- **National Certificate: IT Systems Development** - Issued by CTU Training Solutions
- **INFORMATION TECHNOLOGY DATABASE DEVELOPMENT** – Issued by CTU Training Solutions
- **Microsoft Security Operations Analyst** – Issued by Microsoft
- **Microsoft Azure Security Technologies** – Issued by Microsoft
- **Developing Solutions for Microsoft Azure** – Issued by Microsoft
- **Microsoft Azure Data Fundamentals** – Issued by Microsoft
